

NEUES RAUMGEFÜHL

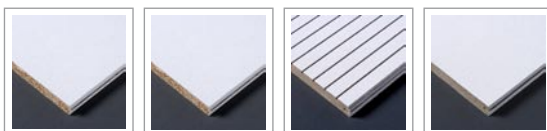

Metal-V ceilings

- Acoustic ceiling
- Acoustic patches
- Metal ceiling cooling systems

Metal-V: large metal acoustic ceiling panels are manufactured from perforated or non-perforated sheet steel with the visible side with covered with acoustic fleece, the panel surface and edges are then oversprayed with BER acoustic lacquer. Fire rating class A2, and sound-absorption classes A to E, all RAL and NCS colours are available.

Panel substrates with the same surface design, but other characteristics

Sonoplus,
wood flake
acoustic panel

Akupor-H,
wood flake
