

Wood flake wall absorbers

- Acoustic ceiling
- Acoustic wall linings
- Acoustic patches
- Ball impact resistant ceiling, wall covering, flexible wall systems

Wood flake finish acoustic panels emphasize the natural character of wood.

Our wood flake finish acoustic panels are finished with with BER structure varnish or BER acoustic lacquer (plain, without structural texture) fire rating class B 1 (fine wood flakes) and B2 (large wood flakes), sound absorber class C (large wood flakes) and D (fine wood flakes). The wood flake surface finish is directionless. The natural appearance of Wood flake panels makes an interesting combination with exposed concrete. Purpose-made and standard sizes are available and all RAL and NCS colours are available.
